GENERAL INFORMATION

St. Anthony's Hospital School of Nursing was organized in 1918. It is conducted by the Sisters of St. Francis and offers excellent opportunities to young women who wish to prepare themselves for the nursing profession.

St. Anthony's Hospital School of Nursing is fully accredited by the department of the Indiana State Board of Examination and Registration of Nurses, Indianapolis, Indiana. The Hospital is accredited and approved by the American College of Surgeons, Class A. The hospital is also approved for training internes and accredited for mixed residencies by the Council on Medical Education and Hospitals of the American Medical Association.

St. Anthony's Hospital School of Nursing realizes the obligation of development for the profession of nursing. Its purpose is to train and educate women who have strength of character, scholarship and poise, so that they will become skilled in the science and art of nursing. To attain this goal its curriculum includes the necessary philosophical, cultural and vocational courses which will secure integrity of character with a broadened and enriched background for nursing.

It is hoped that upon completion of the course the student will be able to take her place in the nursing profession as one who knows how to give good basic nursing care, and to teach health whether in hospital or home; that she will be a nurse interested in family and community health problems, and that with added experience and subsequent graduate professional education, she will be fitted to assume responsibility in positions of administration, teaching and supervision.

St. Anthony's Hospital is a general hospital with 198 beds, including bassinets, and a daily average of 115 to 130 patients. The student nurses receive experience in the care of medical, surgical, gynecological, obstetrical, care of children and communicable disease; also experience in surgery, dietary department, public health nursing, prenatal and postnatal clinics and child welfare clinic.

St. Anthony Hospital is fortunate in being one of the hospitals in Indiana to possess an iron lung for adults and a Drinker Infant Respirator.

The nurses' residence, a fireproof building, adjoins the hospital. It provides private rooms and a few semi-private rooms for the nurses.

The dietary department is under expert supervision, and effort is made to supply well selected and wholesomely prepared food.

For recreation, a spacious auditorium-gymnasium is provided in which there is a stage for dramatics and equipment for physical education and games. The residence has a large sunny lounge with a radio and piano, a library, kitchenette, a tea room, a Blue Room, a sewing room, a reception room and a telephone room. There is a resident matron in charge. The home has a personal address system.

ENTRANCE REQUIREMENTS

Education: Four years attendance at an accredited high school are required for matriculation. A certified transcript of credits (minimum units 15) must be sent to the school office before applicant will be considered for acceptance.

English	2 units
Foreign Language (Latin preferred)	2 units
History	2 units
Mathematics	2½ units
Science—not including general science (General Chemistry required)	2 units
Electives	2½ units

Age: Applicants must be between the ages of 18 and 30. A copy of the birth certificate is required of all applicants.

Health: Applicants must submit a certificate of good health signed at or near the date of application before acceptance will be considered. A certificate from a dentist, stating that the applicant's teeth are in good condition; certificates of smallpox and typhoid vaccinations; the Schick and Dick tests for scarlet fever and diphtheria; and the Mantoux test for tuberculosis are also required.

Character: References are required from two persons (not relatives) as to the moral character of the applicant. These must testify also as to the general fitness of the applicant for the nursing profession, and must accompany the application for enrollment.

Application: Application for admittance must be made to the director of the school of nursing as far in advance of the registration date as possible so as to avoid enrollment delay. A personal interview is more advantageous than correspondence.

Acceptance: Acceptance of any applicant is entirely at the discretion of the director of the school of nursing. When an applicant meets all requirements she will receive a letter of acceptance. The director of the school of nursing may at any time during the pre-clinical period dismiss a student because of unfitness for the profession. After the four months' preclinical period a student may be dismissed for not complying with the rules and regulations of the school, for unsatisfactory work in technique or practice, or for any reason deemed valid by the director. Upon the completion of the preclinical course of instruction, students are assigned to various departments in the hospital service.

Orientation: Orientation week is held during the month of August. The program includes a tour of the hospital, physical examination, X-ray of chest, nursing aptitude tests, and a test of mental ability. A Nurses' Guide is distributed to each student, and its contents discussed. The curriculum is introduced and a series of special lectures are given.

Expenses: For the first year the sum of One Hundred (\$100.00) is required for uniforms, school cape, text books, use of laboratories and library, etc. There is no tuition fee. Each student upon entering must own a watch with a second hand, comfortable black low-heeled oxfords with rubber heels, black stockings, a fountain pen, and several notebooks. Second year a deposit of \$15.00 to cover text books, and activities fees. Third year a deposit of \$10.00 for text books and activities fees. (This does not cover graduation expenses).

CURRICULAR REGULATIONS

Grades: A general average of 75 per cent is necessary for passing. The lowest passing grade is 70 per cent, conditional; below 70 per cent is failure.

Promotion: No student will be admitted to the second or third year who has not removed all conditions and failures of the previous year. Two successive failures in any one subject automatically dismisses a student.

Hours: There is an eight-hour day regulation including classes.

Vacation: Four weeks vacation each year is allowed each student.

Illness: Students when ill are cared for and treated gratuitously by members of the hospital staff. Provision is made for the care of early symptoms and minor ills.

Religion: Any young woman who wishes to abide by the traditional regulations of the school is welcome; her religious beliefs will be respected. Catholic students are expected to cooperate fully with the efforts made for their spiritual welfare.

Graduation: The diploma and pin of the school are presented to all students who have satisfactorily completed the three year course. These are presented when the honor of graduation is conferred.

CURRICULUM

Sequence of Courses:

100—199	Pre-Clinical
200—299	Freshmen
300—399	Junior
400—499	Senior
500—	Extra-professional

COURSE OF INSTRUCTION

101. **Introduction to Nursing Arts.**
Course covers orientation to the field of nursing and nursing school. The aim is to know how to find and evaluate scientific information and its application to daily living and care of the sick. Includes course in Health Education, Lectures, Recitations and Demonstrations.
Term I—156 hours.
102. **Professional Adjustments I.**
A study of the basic principles of professional conduct.
Term I—27 hours.
103. **Anatomy and Physiology.**
A study of the structure and functions of the human body. Recitations, Lectures and Laboratory.
Term I—63 hours.
104. **Microbiology.**
Study of the characteristics and activities of micro-organisms and their relation to health and disease. Lectures, Recitations and Laboratory.
Term I—45 hours.
105. **Pharmacology and Therapeutics (Elementary).**
Study of drugs and solutions and the elementary principles of drug therapy.
Term I—18 hours.
106. **Chemistry.**
Study of chemistry especially its relation to the field of nursing. Recitations, Lectures and Laboratory.
Term I—90 hours.
110. **Principles of Religion and Study of the Sacred Scripture.**
A study of religion in general and the truths of Christianity.
Term I—18 hours.
201. **Nursing Arts (Advanced).**
Continuation of Course 101 including bandaging, general massage by a masseuse and case study.
Term II—108 hours.
202. **History of Nursing.**
Nursing from the pre-Christian Period to Modern Times.
Term II—27 hours.
203. **Anatomy and Physiology.**
Continuation of the course 103. Lectures and recitations.
Term II—63 hours.

204. Nutrition, Foods, Cookery.

Fundamental facts and principles in ^{relation to} ~~relation~~ nutritional needs to maintain health. To know the basic principles involved in the selection, purchasing, care, preparation and serving of food, application of principles to nutrition. Recitations, lectures and laboratory.

Terms II and III—63 hours.

205. General Surgical Pathology and Surgical Nursing.

Unit of the combined course in medical and surgical nursing, dealing with the study, treatment and care of the patients from the surgical viewpoint.

Term II and III—36 hours.

206. Pharmacology and Therapeutics (Advanced).

Continuation of Course No. 105. Study of the various drugs and agencies used in the treatment of disease.

Term II and III—36 hours.

207. Operative Technic Including Anesthesia.

Unit of the combined course in medical and surgical disease nursing; its aim is to help the student develop an appreciation of the scientific basis for aseptic operative technic and routines with application to nursing procedures in general.

Term III—9 hours.

208. Sociology I.

Study of social and economic aspects of human nature and personality, with the purpose of aiding the nurse to better understand the interactions between herself and patients.

Term II and III—18 hours.

301. Obstetrics and Obstetrical Nursing.

Study of maternity nursing during the ante, intra, and post partal periods including a study of the newborn.

Term I—36 hours.

302. Professional Adjustments II.

A study of the nursing survey and allied professional problems of the nursing field, particularly stresses the relationship of nursing organizations.

Term I—9 hours.

303. Skin and Venereal.

A unit of the combined course in medical and surgical nursing dealing with conditions of the skin, and the study and importance of the treatment of venereal disease in an effort toward eradication.

Term II—9 hours.

304. Gynecology.

Study of the diseases of the reproductive organs in order to familiarize the nurse with its significance from the standpoint of the individual and community health.

Term I—9 hours.

305. Urology.

Unit of the combined course in medical and surgical nursing dealing with diseases of the urinary tract.

Term II—9 hours.

306. Diet Therapy.

Dietary modification in treatment of disease and the relation of diet therapy to other therapy in the care of the patient.

Term I—27 hours.

307. Nursing of Children.

The aim of this course is to help the student acquire the knowledge, skill and technic necessary to give adequate nursing care to sick children.

Term I—36 hours.

308. Psychology.

The aim of this course is to help the student appreciate the importance of a scientific attitude toward human behavior and to gain a knowledge of how this attitude may be developed, and to acquire the ability to study objectively the behavior of one's self and others.

Term II and III—36 hours.

309. Emergency and First Aid.

To help prepare the student to meet emergencies and emergency situations.

Term II—9 hours.

310. Principles of Religion ; Study of Sacred Scripture.

Continuation of Course No. 210.

Term I and II—36 hours.

311. Orthopedics.

A unit of combined medical and surgical nursing dealing with orthopedic conditions.

Term II—9 hours.

312. Communicable Diseases.

A unit of the combined medical and surgical nursing dealing with the pathology, symptomatology, complication and sequelae of the common communicable diseases and the intelligent nursing care in these conditions. Study of tuberculosis is also included.

Term II—27 hours.

314. Medical Ethics.

A lecture course on the moral principles that govern medical practice as applied to the nursing profession.

Term II—27 hours.

401. Eye, Ear, Nose, Throat.

A unit of the combined medical and surgical nursing dealing with the diseases, treatment and preventive measures of the eye, ear, nose, throat. Dental lectures also included.

Term I—18 hours.

402. Social and Professional Problems.

A unit of study of the course in professional and social adjustment.

Term I—9 hours.

403. Nursing and Related Legislation.

A unit of study of the advanced course in professional and social adjustment dealing with Jurisprudence for nurses.

Term I—9 hours.

404. Sociology II.

A unit of study of the advanced course in professional and social adjustment dealing with social life.

Term I—18 hours.

405. Psychiatry.

A study of psychiatric disorders and facilities for dealing with them. Lectures and field trips.

Term I—18 hours.

406. Introduction to Philosophy.

Study of the principles, scope and nature of philosophy, and its relation to science and religion.

Term I—18 hours.

407. Nursing and Health Service in the Family.

Study of public health nursing in the family. Lectures and field trips.

Term II—9 hours.

408. Pathology III.

A unit under medical science dealing with pathological conditions in the general field of medical science.

Term II—18 hours.

409. Sanitary Science.

A unit of medical science dealing with problems of sanitation affecting the health of the people in a community. Lectures and field trips.

Term II—18 hours.

410. Principles of Religion; Study of Sacred Scriptures.

Continuation of Course No. 310.

Term I and II—36 hours.

411. Philosophy.

A continuation of Course No. 406.

Term II—18 hours.

501. Legal Legislation in the Field of Nursing.

A study of legislation regarding the hospital and nursing field. Course given in connection with nursing and related legislation.

Term II—9 hours.

502. Parliamentary Law.

A study of parliamentary procedure based on Roberts' Rules of Order. Given each year to the Freshman Class.

Term II—9 hours.

503. Library Science.

A series of lectures given by the Librarian on the use of the library.

Term II—Freshmen.
